

salt spring internet

local, dependable internet service

Salt Spring Accelerated Dial-up Packages:

Accelerated Access is the latest in Internet access technology designed to increase the speed of dial-up Internet. The technology significantly increases the speed of web surfing for dial-up users, particularly on graphic intensive sites. It works by compressing image and text data on the Internet and then opening the data only once it has reached your computer. This allows data to travel through the Internet to your computer more quickly.
